PROFESSIONAL SUMMARY

Full Stack Developer with 17 months of professional experience building web applications and RESTful APIs using Laravel, React, and MySQL. Skilled in developing API endpoints, implementing authentication and role-based access control, designing relational databases, and integrating responsive React frontends with Laravel backends. Familiar with Git, GitHub, and Postman, with ongoing learning in Docker and GitHub Actions (CI/CD).

PROFESSIONAL EXPERIENCE

Web Developer *July 2024 – December 2025*

iCreativez Software Company

- Built and maintained 4+ web applications, including blog, clinic management, and task management systems using Laravel and React.
- Developed and integrated 30+ RESTful API endpoints using Laravel, implementing authentication, request validation, and MySQL database operations.
- Built responsive frontend interfaces and integrated them with backend APIs; tested and debugged API endpoints using Postman.
- Used Git and GitHub for version control, feature development, code management, and collaborative workflows.

EDUCATION

Bachelor's Degree in Software Engineering *2021 – 2025*

Quaid-e-Awam University of Engineering, Science & Technology (QUEST), Nawabshah, Pakistan

PROJECTS

Multi-Vendor E-Commerce Web Application *React + Vite | Laravel 12 | MySQL*
Frontend Repository / *Backend Repository*

- Built a full-stack e-commerce platform with separate Admin, Seller, and Customer roles and dashboards.
- Developed responsive frontend interfaces integrated with REST APIs for products, inventory, cart, wishlist, checkout, orders, reviews, and notifications.
- Implemented Laravel Sanctum API authentication, role-based access control, and Redux Toolkit for global state management.

Task Management System *Laravel 12 | MySQL | Bootstrap | JavaScript*
GitHub Repository

- Built a role-based task management system supporting Admin, Team Lead, and Team Member workflows.
- Implemented user and team management, task assignment, status tracking, threaded comments, and file attachments.
- Developed authentication, role-based access control, and relational database functionality using Laravel and MySQL.

Doctors Clinic APIs *Laravel 12 | MySQL | REST APIs | Postman*
Private Project

- Developed RESTful APIs for a clinic management system covering appointments, patients, and staff workflows.
- Implemented authentication, request validation, API endpoints, and relational database functionality.
- Tested and debugged API endpoints using Postman and verified database interactions with MySQL.

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL, HTML, CSS
Frontend: React.js, Vite, Tailwind CSS, Bootstrap, Material UI
Backend: Laravel 12, RESTful APIs
Database: MySQL
Authentication & Authorization: Laravel Sanctum, API Token Authentication, Role-Based Access Control
State Management: Redux Toolkit
Tools: Git, GitHub, Postman, VS Code
Currently Learning: Docker, GitHub Actions (CI/CD), Automated Testing and Deployment
