SUMMARY

Software Engineer with 17 months of professional experience as a Web Developer at iCreativez Software Company. Experienced in developing and maintaining web applications with a focus on backend development, application functionality, and reliable software solutions. Motivated and detail-oriented developer with a strong interest in growing as a Full Stack Developer.

PROFESSIONAL EXPERIENCE

Web Developer **July 2024 – December 2025**

iCreativez Software Company

- Developed and maintained web applications including Blog, Clinic, Task Management, and other business applications.
- Developed RESTful APIs and backend functionality with database integration, authentication, validation, relationships, and API endpoints.
- Created responsive frontend interfaces, integrated frontend functionality with backend APIs, and tested features using Postman.
- Used Git and GitHub for version control and source-code management while troubleshooting issues and implementing improvements.

EDUCATION

Bachelor's Degree in Software Engineering **2021 – 2025**

Quaid-e-Awam University of Engineering, Science & Technology (QUEST) *Nawabshah, Pakistan*

PROJECTS

Multi-Vendor E-Commerce Web Application *React + Vite | Laravel 12 | MySQL*

- Developed a full-stack e-commerce application with Admin, Seller, and Customer roles.
- Built responsive frontend interfaces integrated with RESTful APIs for products, inventory, cart, wishlist, checkout, orders, payments, reviews, notifications, and profiles.
- Implemented authentication, role-based access, database relationships, state management, API testing, and Git/GitHub version control.

Task Management System *Laravel 12 | MySQL | Bootstrap | JavaScript*

- Developed a role-based task management system for Admin, Team Lead, and Team Member workflows.
- Implemented user and team management, task creation and assignment, status tracking, comments, and file functionality.
- Developed authentication, role-based access, database relationships, and backend functionality using Laravel and MySQL.

Doctors Clinic APIs *Laravel 12 | MySQL | REST API | Postman*

- Developed RESTful APIs for a doctors clinic management system and its business workflows.
- Implemented API endpoints with authentication, validation, database relationships, and data management functionality.
- Tested and debugged APIs using Postman and integrated them with the MySQL database.
